**MHCWD  
 TREATED WATER SERVICE**

**RATES & BILLING**

All Midway Heights County Water District treated water service customers are billed a service charge of \$59.32 per meter per month regardless of the amount of water used. In addition, there is a usage charge of \$3.53 for each unit of water used (1-unit = 100 cubic feet = 748 gallons). Water bills are currently being sent out every other month and reflect a bill for service obtained during the previous two-month period.

The purpose of the treated water system is for domestic use inside the home, and the reason for the increase in charges after 8-units per month is to discourage outside use of the water. If a customer uses 200 gallons of treated water per day, which is approximately 8-units per month, the total monthly bill for treated water will be approximately \$87 (or \$175 for 2 months). If 400 gallons per day are used, which is approximately 16-units per month, the bill will be approximately \$116 per month (or \$232 for 2 months). It is easy to see why we urge you to conserve by not using the treated water for exterior landscape irrigation; in most cases, it will be more economical for customers to purchase irrigation water for exterior uses. The following table shows approximate amounts of water used for common water uses inside the home. This is provided to help you judge your family's water usage.

<u>HOUSEHOLD ACTIVITY</u>	<u>GALLONS OF WATER</u>
One average bath or shower	25 - 35
One average full size clothes washer load	25 - 35
One pre-rinse and wash of a full load of dishes	10 - 15
One toilet flush	2 - 3
